

Dear the pombe researchers

Thank you very much for your participations in the survey about the next Pombe International meeting in Hiroshima.

We have received 183 replies to the questionnaires (93 from Europe, 50 from Asia/Oceania, 40 from America). Attached please find a summary of survey results.

The results say that 1) the majority of people prefer the meeting to be held on-site, and 2) June 2022 is most popular, followed by June 2023.

Based upon these results, we will pursue the option for June 2022. To do so, however, the following conditions have to be fulfilled. First, travel restrictions, in particular to people from overseas, must be withdrawn; there would be no quarantine. Second, other restrictions such as regulations over the number of meeting attendants, eating/drinking and in-person conversations would be eased to a great extent. We think that we can wait for the final decision until the end of next February. Then if the situation becomes as hoped, we would make an announcement through this site and our HP (<http://fission-yeast2022.org/>). Of course, if the situation becomes improved before the end of February, we could act earlier. If the situation seems unfavourable, the meeting will be postponed and rescheduled in June 2023.

Thank you very much for your great help, and hopefully we can see you in Hiroshima next June.

Best wishes,

Takashi and meeting organisers
